

ASTON VISION SCIENCES

High performance Fluorescein Filter ready to take your Clinic to the next level!

Our colour enhanced Fluorescein Filter is the perfect choice for high-resolution and effortless observation of the anterior surface and a wide range of anterior eye defects

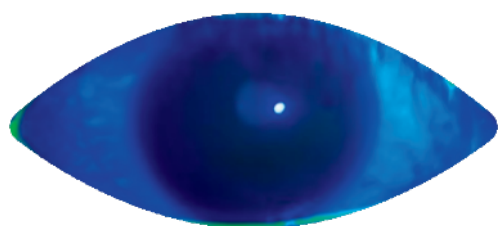

Elevate your Clinical Practice with Superior Viewing of:

- Tear break up
- Epithelium damage
- Corneal abrasions
- Foreign bodies
- Contact lens fitting
- Partial blinking

Filter can be used by hand or on a compatible slit lamp

Without Fluorescein Filter

Limited viewing with tear film barely visible

With AVS Fluorescein Filter

Hidden details revealed with tear break up visible

WHY CHOOSE OUR FILTER

1 See more details

With a unique colour formula tuned to work close to the fluorescein emission spectrum, you always receive high clarity, and contrast

2 Multi use

Easy to hold, the Filter has been designed to clip on most slit lamps, allowing for a fast and simple upgrade of existing equipment

3 Anti Scratch Protection

Raised bumpers on the Filter, along with a large lens area, give both protection and clear unobstructed viewing

4 Low Cost, High Performance

With high performance, especially in lower blue-light levels, simplicity, and a low cost, AVS's Fluorescein Filter is the best solution

QUALITY EYECARE, EVERYWHERE

Aston Vision Sciences is an innovative creator of technically advanced, high-value solutions for the ophthalmology eyecare market.
